

## **Announcement of Pending BOA Competition**

**PROVISION OF BALLISTIC MISSILE DEFENCE (BMD) OPERATIONAL ASSURANCE, HAND OVER, TRAINING AND MENTORING CAPABILITY WITHIN EDUCATION, TRAINING, EXERCISE AND EVALUATION (ETEE) FUNCTIONAL SERVICES (FS)**

**RFQ-CO-115625-ETEE**

**RFQ Estimated Release Date: May 2022**

**Estimated Bid Closing Date: July 2022**

The purpose of this upcoming RFQ now pending authorization is to select a vendor for the provision of services to deliver and implement Operational Assurance, Hand Over, Training and Mentoring Capability within Ballistic Missile Defence (BMD) Increment 1 Functions in Education, Training, Exercise and Evaluation (ETEE) Functional Services (FS).

The prospective Bidders' list is attached. Interested companies **already holding an active BOA** with the NCI Agency may contact the below POC to request inclusion in the Bidders' list:

**Senior Contracting Officer: Mr. Peter Kowalski**  
**E-mail: [Peter.Kowalski@ncia.nato.int](mailto:Peter.Kowalski@ncia.nato.int)**

Annexes:

1. Summary of requirements
2. Prospective Bidders List

## 1. Introduction:

The purpose of this upcoming RFQ is to select a contractor through the existing NCI Agency Basic Ordering Agreement (BOA) procedure with the aim to obtain the provision of services to deliver and implement Operational Assurance, Hand Over, Training and Mentoring Capability within Ballistic Missile Defence (BMD) Increment 1 Functions in Education, Training, Exercise and Evaluation (ETEE) Functional Services (FS).

The RFQ is conducted under the new NATO Procedures: “*Procedure Governing the Use of Basic Ordering Agreements concluded by the NATO Communications and Information Agency – 2019 version*”, Ref: AC/4-D(2019)0004 (INV).

SPECIAL NOTE: With the aim to prevent an organizational conflict of interest in industrial roles under the overarching ETEE FS project, Bidders and their prospective Sub-Contractors shall be excluded from participation in the companion NCI Agency ETEE FS projects conducted under solicitations IFB-CO-115112-ETEE (Enhanced JEMM), IFB-CO-115113 (AMD Simulation), and RFQ-CO-115114 (Exercise IM Portal).

## 2. Scope

This project will contribute to the successful delivery of the ETEE FS BMD capability by providing the following support:

- Testing and validation of the BMD enhanced JEMM system in synchronization with the agile development of the system. JEMM is an existing operational service-oriented web application that will be enhanced through this project.
- Testing and validation of the AMD simulation system in synchronization with the agile development of the system. The AMD simulation will extend an existing air simulation with BMD models and add interaction with JEMM through web services.
- Production of the test reports that are necessary for the systems above to achieve fielding approval.
- Production of user training materials for the added scope to JEMM and to AMD.
- Hand-over of the ETEE FS BMD capability to the operational user community through a period of training and mentoring during its initial utilisation.

This project will develop the necessary test plans, test cases and test data to support the testing of each of the steps of the agile development process for the systems mentioned in the introduction based on functionality that needs to be delivered during each step of the development process. This project will support the execution of the tests and assist in capturing and documenting test results. The majority of the project activities will be conducted remotely on the internet-hosted NATO Software Factory.

The rough financial order of magnitude of the resulting contract is EUR 3M. The project will consist of two consecutive phases of approximately 12 months each, both resulting in a baseline delivery for each of the systems.

## 3. Timeline

RFQ release:	May 2022
Contract Award:	December 2022
